## American Innovative Manufacturing

Our patented battery powered equipment provides unparalleled flexibility in how and where repairs can be made. Using its patented design and construction, repair shops do not need to run 220v service throughout the shop and pay high demand charge fees to operate their equipment. Eliminate the risk of power surges impacting the rest of your shop. The Hybrid Welding Station can be used anywhere. AIM offers powerful, precise, mobile, and affordable solutions where power and cost constraints are critical in the

### Standard Equipment:

- High Pressure Pneumatic Handle
- 10" & 20" Extension Arms
- Replaceable Cap Electrode System; 10-Pack Assortment of Caps
- H.D. Ground Attachment
- 10ft. Air Cooled Cables

### Optional Packages Available

SA-116 Single Sided Spot Welding Package

SA-117 Panel Beater Package

## Hybrid Resistance Spot Welder

### About American Innovative Manufacturing

AIM is the exclusive and only authorized manufacturer of the patented DC-battery powered dent pulling equipment and the original hybrid battery powered resistance spot welder. [www.ai-mfg.com](http://www.ai-mfg.com)
